Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Exit Flowfield of an Embedded Stator in a Multistage Axial Flow Compressor B97-022
Interpretation of Finite Element Analysis Results of Scramaccelerator Thrust B97-065
Applications of Algebraic Reynolds Stress Turbulence Models Part 1: Incompressible Flat Plate B97-088
Applications of Algebraic Reynolds Stress Turbulence Models Part 2: Transonic Shock-Separated Afterbody B97-089

Aerospace Plane

Mach 6 Testing of a Scramjet Engine Model B97-078

Noise

Modular Prediction Scheme for Blade Row Interaction Noise B97-047
Zonal Approach for Prediction of Jet Noise B97-105

Performance

Uncertainty Assessment of Ramjet Performance Determination in Connected-Pipe Testing B97-103

Testing, Flight and Ground

Uncertainty Assessment of Ramjet Performance Determination in Connected-Pipe Testing B97-103
Cored Brick Storage Heater Analysis B97-113

Energy

Alternate Fuels

Ignition Characteristics of a New High-Energy Density Fuel in High-Speed Flows B97-033
Fundamental Constraints on Large-Scale Antimatter Rocket Propulsion B97-061

Conservation

Combustion Initiated by a Porous Ceramic Regenerator in a Reciprocating Engine Environment B97-028

Hydrogen and Unique Fuels

Prediction of Pressurant Mass Requirements for Axisymmetric Liquid Hydrogen Tanks B97-112

Reciprocating Machinery

Multidimensional Modeling of Fuel Effects and Split Injections on Diesel Engine Cold-Starting B97-015

Rotating Machinery

Computational Study of Rotating-Stall Inception in Axial Compressors B97-004
Exit Flowfield of an Embedded Stator in a Multistage Axial Flow Compressor B97-022
Experimental Study on Rotating Cavitation of Rocket Propellant Pump Inducers B97-070
Macroscopic Balance Model for Wave Rotors B97-073
Jet Engine Component Maps for Performance Modeling and Diagnosis B97-095

Solar Power

Thermal Analysis of the Heat Exchangers and Regenerator in Stirling Cycle Machines B97-057
Solar Space Power System Optimization with Ultralight Radiator B97-080

Stirling Engine

Thermal Analysis of the Heat Exchangers and Regenerator in Stirling Cycle Machines B97-057

Thermionic

Biphase Inverter Based on Cesium Plasma Switches B97-081

Fluid Dynamics

Aeroacoustics

Modular Prediction Scheme for Blade Row Interaction Noise B97-047
Mean Stator Loading Effect on the Acoustic Response of a Rotating Cascade B97-072
Assessment of Jet Noise Analysis Codes for Multistream Axisymmetric and Forced Mixer Nozzles B97-104
Zonal Approach for Prediction of Jet Noise B97-105

Boundary Layers and Heat Transfer—Laminar

Multiple-Scales Solution to the Acoustic Boundary Layer in Solid Rocket Motors B97-024

Boundary Layers and Heat Transfer—Turbulent

Tangential Injection from Overlaid Slots into a Supersonic Stream B97-007
Cored Brick Storage Heater Analysis B97-113

Computational Fluid Dynamics

Unsteady Flow and Shock Motion in a Transonic Compressor Rotor B97-002
Computational Study of Rotating-Stall Inception in Axial Compressors B97-004
Secondary Flow Computation Using an Inviscid Multigrid Finite Volume Lambda Formulation B97-006
Mass-Flux-Based Implicit Multigrid Method for Modeling Multidimensional Combustion B97-012
Comparison Between Presumed and Monte Carlo Probability Density Function Combustion Modeling B97-013
Numerical Study of Hypervelocity Flows Through a Scramjet Combustor B97-016
Flow Analysis of a Solid Propellant Rocket Motor with Aft Fins B97-025
Monte Carlo Probability Density Function Method for Gas Turbine Combustor Flowfield Predictions B97-029
Analysis of Supersonic Combustors with Swept Ramp Injectors B97-045
Skin-Friction Predictions in a Crossing-Shock Turbulent Interaction B97-048
Partial Differential Equation Surface Generation and Functional Shape Optimization of a Swirl Port B97-056
Overexpanded Two-Dimensional–Convergent-Divergent Nozzle Flow Simulations, Assessment of Turbulence Models B97-062
Thrust Enhancement in Hypervelocity Nozzles by Chemical Catalysis B97-083
Applications of Algebraic Reynolds Stress Turbulence Models Part 1: Incompressible Flat Plate B97-088
Applications of Algebraic Reynolds Stress Turbulence Models Part 2: Transonic Shock-Separated Afterbody B97-089
Plug Nozzle Flowfield Analysis B97-090
Flammability Limits and Probability Density Functions in Simulated Solid-Fuel Ramjet Combustors B97-092
Effect of Wall Roughness on the Flow Through Converging–Diverging Nozzles B97-106
Numerical Analysis of a Two-Dimensional Magnetoplasmadynamic Arcjet B97-111

Hypersonic Flow

Analytical Model of Unsteady Shock Motion on Hypersonic Forebodies B97-001
Numerical Study of Hypervelocity Flows Through a Scramjet Combustor B97-016
Interpretation of Finite Element Analysis Results of Scramaccelerator Thrust B97-065
Performance Limits for Projectile Flight in the Ram and External Propulsion Accelerators B97-085
Analytical Solution of the Type IV Shock Interaction B97-087
Off-Design Performance Prediction of Single-Spool Turbojets Using Gasdynamics B97-117

Inlet, Nozzle, Diffuser, and Channel Flows

Analytical Model of Unsteady Shock Motion on Hypersonic Forebodies B97-001
Secondary Flow Computation Using an Inviscid Multigrid Finite Volume Lambda Formulation B97-006
Mixing Characteristics of Forced Mixers with Scalloped Lobes B97-041
Flow Through a Rectangular-to-Semiannular Diffusing Transition Duct B97-042
Skin-Friction Predictions in a Crossing-Shock Turbulent Interaction B97-048
Counterflow Thrust Vector Control of Subsonic Jets: Continuous and Bistable Regimes B97-058
Turbulent Mixing of Coaxial Nozzle Flows with a Central-Lobed Mixer B97-074
Thrust Enhancement in Hypervelocity Nozzles by Chemical Catalysis B97-083
Plug Nozzle Flowfield Analysis B97-090
Effect of Wall Roughness on the Flow Through Converging–Diverging Nozzles B97-106

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Tangential Injection from Overlaid Slots into a Supersonic Stream B97-007

Velocity Measurements of a Jet Injected into a Supersonic Crossflow B97-036
Counterflow Thrust Vector Control of Subsonic Jets: Continuous and Bistable Regimes B97-058
Theoretical Formulation for Sauter Mean Diameter of Pressure-Swirl Atomizers B97-098
Assessment of Jet Noise Analysis Codes for Multistream Axisymmetric and Forced Mixer Nozzles B97-104
Zonal Approach for Prediction of Jet Noise B97-105

Multiphase Flows

Breakup Processes of Liquid Jets in Subsonic Crossflows B97-008
Effect of Acoustic Perturbations on Liquid Jet Atomization B97-010

Plasmadynamics and MHD

Optimal Control of Quasi-One-Dimensional Self-Field Magnetoplasmadynamic Arcjet Flowfields B97-019
Performance and Acceleration Process of Quasisteady Magnetoplasmadynamic Arcjets with Applied Magnetic Fields B97-093
Experimental Study of Hydrogen Heating in Powerful Electric Discharge Launcher B97-094
Extensive Validation of a Monte Carlo Model for Hydrogen Arcjet Flowfields B97-109
Measurements of Electron Density in the Charge Exchange Plasma of an Ion Thruster B97-110
Numerical Analysis of a Two-Dimensional Magnetoplasmadynamic Arcjet B97-111

Reacting Flows and Combustion

Droplet Autoignition in a Reactive Oxidant/Fuel–Vapor/Inert Environment B97-011
Mass-Flux-Based Implicit Multigrid Method for Modeling Multidimensional Combustion B97-012
Comparison Between Presumed and Monte Carlo Probability Density Function Combustion Modeling B97-013
Numerical Study of Hypervelocity Flows Through a Scramjet Combustor B97-016
Effect of Catalyst Mixing Procedure on Subatmospheric Combustion Characteristics of Composite Propellants B97-027
Monte Carlo Probability Density Function Method for Gas Turbine Combustor Flowfield Predictions B97-029
Ignition Characteristics of a New High-Energy Density Fuel in High-Speed Flows B97-033
Analysis of Supersonic Combustors with Swept Ramp Injectors B97-045
Effects of Mixing Schemes on Kerosene Combustion in a Supersonic Airstream B97-075
Hydrogen Autoignition and Combustion in Supersonic Flow at Low Equivalence Ratio B97-076
Performance Limits for Projectile Flight in the Ram and External Propulsion Accelerators B97-085
Performance Optimization of a Supersonic Combustion Ram Accelerator Projectile B97-086
Flammability Limits and Probability Density Functions in Simulated Solid-Fuel Ramjet Combustors B97-092
Study of a Supersonic Combustor Employing Swept Ramp Fuel Injectors B97-099
Open-Loop Performance of a Fast-Response, Actively Controlled Fuel Injector Actuator B97-100
Effects of Inlet Configuration on Ignition and Fuel Regression Behind a Backstep B97-101

Separated Flows

Skin-Friction Predictions in a Crossing-Shock Turbulent Interaction B97-048
Overexpanded Two-Dimensional–Convergent-Divergent Nozzle Flow Simulations, Assessment of Turbulence Models B97-062
Plug Nozzle Flowfield Analysis B97-090
Effects of Inlet Configuration on Ignition and Fuel Regression Behind a Backstep B97-101

Shock Waves and Detonations

Analytical Solution of the Type IV Shock Interaction B97-087

Subsonic Flow

Secondary Flow Computation Using an Inviscid Multigrid Finite Volume Lambda Formulation B97-006
Flow Through a Rectangular-to-Semiannular Diffusing Transition Duct B97-042
Applications of Algebraic Reynolds Stress Turbulence Models Part 1: Incompressible Flat Plate B97-088

Supersonic Flow

Velocity Measurements of a Jet Injected into a Supersonic Crossflow B97-036
Analysis of Supersonic Combustors with Swept Ramp Injectors B97-045
Overexpanded Two-Dimensional–Convergent-Divergent Nozzle Flow Simulations, Assessment of Turbulence Models B97-062
Absolute Instability in a Supersonic Shear Layer and Mixing Control B97-107

Transonic Flow

Unsteady Flow and Shock Motion in a Transonic Compressor Rotor B97-002
Applications of Algebraic Reynolds Stress Turbulence Models Part 2: Transonic Shock-Separated Afterbody B97-089

Unsteady Flows

Analytical Model of Unsteady Shock Motion on Hypersonic Forebodies B97-001
Unsteady Flow and Shock Motion in a Transonic Compressor Rotor B97-002
Computational Study of Rotating-Stall Inception in Axial Compressors B97-004
Chordwise Bending Cascade Unsteady Aerodynamics by an Experimental Influence Coefficient Technique B97-005
Gust Response Decomposition in a Stator/Rotor Axial Compressor with Varying Axial Gap B97-023
Multiple-Scales Solution to the Acoustic Boundary Layer in Solid Rocket Motors B97-024
Modular Prediction Scheme for Blade Row Interaction Noise B97-047
Experimental Study on Rotating Cavitation of Rocket Propellant Pump Inducers B97-070
Macroscopic Balance Model for Wave Rotors B97-073

Vortices

Tip Clearance Flow–Shock Interaction in a Transonic Compressor Rotor B97-003
Vortex Shedding in a Large Solid Rocket Motor Without Inhibitors at the Segment Interfaces B97-026
Turbulent Mixing of Coaxial Nozzle Flows with a Central-Lobed Mixer B97-074

Wave Motion and Sloshing

Stability of Thin Liquid Sheet Flows B97-009

Guidance, Control, and Dynamics Technology

Control System Effectors

Identification of Continuous-Time, Linear, and Nonlinear Models of an Electromechanical Actuator B97-097

Control Theory

Open-Loop Performance of a Fast-Response, Actively Controlled Fuel Injector Actuator B97-100

Dynamics

Hybrid Friction–Impact Vibration Damper for Cryogenic Rotating Machinery B97-071

Engine Control

Open-Loop Performance of a Fast-Response, Actively Controlled Fuel Injector Actuator B97-100

Fiber Optics

Fiber–Optic Probe for Laser-Induced Fluorescence Measurements of the Fuel–Air Distribution in Gas-Turbine Combustors B97-053

Optimization Techniques

Mixed Integer Programming-Based Power Scheduler for the Space Station B97-018
Partial Differential Equation Surface Generation and Functional Shape Optimization of a Swirl Port B97-056
Performance Optimization of a Supersonic Combustion Ram Accelerator Projectile B97-086

Interdisciplinary Topics

Analytical and Numerical Methods

Vortex Shedding in a Large Solid Rocket Motor Without Inhibitors at the Segment Interfaces B97-026

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

Vortex Shedding in a Large Solid Rocket Motor Without Inhibitors at the Segment Interfaces B97-026

Propulsion and Propellant Systems

Comment on "Intrinsic Combustion Instability of Solid Energetic Materials" B95-101
Payload to Low Earth Orbit by Aerospace Plane with Scramjet Engine B97-021
Flow Analysis of a Solid Propellant Rocket Motor with Aft Fins B97-025
Effect of Catalyst Mixing Procedure on Subatmospheric Combustion Characteristics of Composite Propellants B97-027
High-Thrust–High-Specific Impulse Gasdynamic Fusion Propulsion System B97-059
Uncertainty Assessment of Performance Evaluation Methods for Solar Thermal Absorber/Thruster Testing B97-079
Prediction of Pressurant Mass Requirements for Axisymmetric Liquid Hydrogen Tanks B97-112
Further Examination of Enthalpy Rocket Performance B97-115

Testing, Flight and Ground

Uncertainty Assessment of Performance Evaluation Methods for Solar Thermal Absorber/Thruster Testing B97-079
Identification of Continuous-Time, Linear, and Nonlinear Models of an Electromechanical Actuator B97-097

Propulsion

Airbreathing Propulsion

Tip Clearance Flow–Shock Interaction in a Transonic Compressor Rotor B97-003
Chordwise Bending Cascade Unsteady Aerodynamics by an Experimental Influence Coefficient Technique B97-005
Comparison Between Presumed and Monte Carlo Probability Density Function Combustion Modeling B97-013
Prediction of Soot Emissions in Gas-Turbine Combustors B97-014
Experimental Studies on Piloted Supersonic Combustion Using the Petal Nozzle B97-017
Effects of Incorporating a Cone Swirler into a Side-Inlet Ducted Ramrocket B97-020
Payload to Low Earth Orbit by Aerospace Plane with Scramjet Engine B97-021
Exit Flowfield of an Embedded Stator in a Multistage Axial Flow Compressor B97-022
Gust Response Decomposition in a Stator/Rotor Axial Compressor with Varying Axial Gap B97-023

Thrust Losses in Hypersonic Engines Part 2: Applications B97-039
Evaluation of Performance Loss Methods for High-Speed Engines and Engine Components B97-040
Optical and Pressure Measurements in Shock Tunnel Testing of a Model Scramjet Combustor B97-054
Experimental Studies on Self-Ignition of Hydrogen/Air Supersonic Combustion B97-077
Mach 6 Testing of a Scramjet Engine Model B97-078
Comparison of Scramjet Engine Performance in Mach 6 Vitiated and Storage-Heated Air B97-091
Study of a Supersonic Combustor Employing Swept Ramp Fuel Injectors B97-099
Operation of Quasi-Two-Dimensional Projectiles in a Ram Accelerator B97-114

Solid Rocket Motors and Missile Systems

Stability Testing of Full-Scale Tactical Motors B97-049
Nonlinear Stability Testing of Full-Scale Tactical Motors B97-050
Improvements to Steady-State Combustion Modeling of Cyclotrimethylenetrinitramine B97-052
Mechanism of Burning Rate Enhancement of Composite Solid Propellants by Ferric Oxide B97-068

Supersonic Combustion

Experimental Studies on Piloted Supersonic Combustion Using the Petal Nozzle B97-017
Normal, Sonic Helium Injection Through a Wedge-Shaped Orifice into Supersonic Flow B97-035
Fuel Stagnation Temperature Effects on Mixing with Supersonic Combustion Flows B97-037
Optical and Pressure Measurements in Shock Tunnel Testing of a Model Scramjet Combustor B97-054
Interpretation of Finite Element Analysis Results of Scramaccelerator Thrust B97-065
Effects of Mixing Schemes on Kerosene Combustion in a Supersonic Airstream B97-075
Hydrogen Autoignition and Combustion in Supersonic Flow at Low Equivalence Ratio B97-076
Experimental Studies on Self-Ignition of Hydrogen/Air Supersonic Combustion B97-077
Performance Limits for Projectile Flight in the Ram and External Propulsion Accelerators B97-085
Performance Optimization of a Supersonic Combustion Ram Accelerator Projectile B97-086
Comparison of Scramjet Engine Performance in Mach 6 Vitiated and Storage-Heated Air B97-091
Study of a Supersonic Combustor Employing Swept Ramp Fuel Injectors B97-099
Laser-Induced Spark Flameholding in Supercritical, Subsonic Flow B97-102
Absolute Instability in a Supersonic Shear Layer and Mixing Control B97-107

Transient Combustion and Detonation

Properties of Laminar Premixed $CO/H_2/Air$ Flames at Various Pressures B97-032
High-Speed Photographic Study of the Impact Response of Ammonium Dinitramide and Glycidyl Azide Polymer B97-067

Space Technology

Mission Design and Analysis

Power System Analysis of Multikilowatt Space/Planet Stations B97-043
Antiproton Catalyzed Fusion Propulsion for Interplanetary Missions B97-060

Space Systems

Thermal Analysis of the Heat Exchangers and Regenerator in Stirling Cycle Machines B97-057

Spacecraft Power

Mixed Integer Programming-Based Power Scheduler for the Space Station B97-018
Power System Analysis of Multikilowatt Space/Planet Stations B97-043
Solar Space Power System Optimization with Ultralight Radiator B97-080
United States Laboratory Element Electrical Power System Verification Approach B97-082

Spacecraft Test and Evaluation

United States Laboratory Element Electrical Power System Verification Approach B97-082

Spacecraft Thermal Management

Stability of Thin Liquid Sheet Flows B97-009
Power System Analysis of Multikilowatt Space/Planet Stations B97-043

Structural Mechanics and Materials

Dynamic Model Analysis

Hybrid Friction–Impact Vibration Damper for Cryogenic Rotating Machinery B97-071

Structural Composite Materials

High-Temperature Braided Rope Seals for Static Sealing Applications **B97-096**

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Modeling and Experiments of Laser-Induced Ignition of Nitramine Propellants **B97-051**

Cryogenics

Prediction of Pressurant Mass Requirements for Axisymmetric Liquid Hydrogen Tanks **B97-112**

Heat Conduction

Cored Brick Storage Heater Analysis **B97-113**

Laser Interaction

Comment on "Intrinsic Combustion Instability of Solid Energetic Materials" **B95-101**

Nonintrusive Diagnostics

Fiber–Optic Probe for Laser-Induced Fluorescence Measurements of the Fuel–Air Distribution in Gas-Turbine Combustors **B97-053**

Measurement System for Determining Solid Rocket Propellant Burning Rate Using Reflection Microwave Interferometry **B97-066**

Thermal Modeling and Analysis

Multidimensional Modeling of Fuel Effects and Split Injections on Diesel Engine Cold-Starting **B97-015**

Solar Space Power System Optimization with Ultralight Radiator **B97-080**

Thermochemistry and Chemical Kinetics

Extensive Validation of a Monte Carlo Model for Hydrogen Arcjet Flowfields **B97-109**

Effects of Kinetic Rate Uncertainty on the Predicted Performance of Solar Thermal Rockets **B97-116**

Thermophysical Properties

Measurement System for Determining Solid Rocket Propellant Burning Rate Using Reflection Microwave Interferometry **B97-066**

DEVELOPMENTS IN HIGH SPEED-VEHICLE PROPULSION SYSTEMS

S. N. B. Murthy and E. T. Curran, editors

Drawing on the expertise of international engineers and researchers in the field of high speed-vehicle propulsion systems, these articles, written by experts from the U.S., Russia, Germany, Japan, Belgium, and Israel, highlight the most recent developments in the industry.

Contents:

Introduction • Optimal Aerodynamic Shapes • Low Speed Propulsion Systems • High Mach Number Turbo Engines • Turbojet Engines for High Speed Flight • Turbo-Ramjets and Installation • Russian Contributions on Turbo-Ramjets • Air Turbo-Rocket Schemes • Air Collection and Processing Cycles • Air Collection Systems • Pulse Detonation Engine Concepts • Pulsejet Engines • Thermal Management • Energy Management: Implications and Methodology

CA and VA residents add applicable sales tax. For shipping and handling add $4.75 for 1–4 books (call for rates for higher quantities). All individual orders, including U.S., Canadian, and foreign, must be prepaid by personal or company check, traveler's check, international money order, or credit card (VISA, MasterCard, American Express, or Diners Club). All checks must be made payable to AIAA in U.S. dollars, drawn on a U.S. bank. Orders from libraries, corporations, government agencies, and university and college bookstores must be accompanied by an authorized purchase order. All other bookstore orders must be prepaid. Please allow 4 weeks for delivery. Prices are subject to change without notice. Returns in sellable condition will be accepted within 30 days. Sorry, we can not accept returns of case studies, conference proceedings, sale items, or software (unless defective). Non-U.S. residents are responsible for payment of any taxes required by their government.

Aerospace Thermal Structures and Materials for a New Era

Earl A. Thornton

Presenting recent advances in technology for high temperature structures and materials, this new book will be of great interest to engineers and material scientists working on advanced aeronautics and astronautics projects which involve elevated temperatures. Other topics discussed include high speed flight in the atmosphere, propulsion systems, and orbiting spacecraft.

The latest research is compiled here in 19 papers written by various experts from all over the world. Complete with figures, graphs, and illustrations, this new compilation of research is an essential volume for all engineers and scientists involved in aerospace thermal structures and materials.

CHAPTERS:

Analysis of Thermal Structures
Experimental Studies of Thermal Structures
Analysis of High Temperature Composites
Performance of Aircraft Materials

1995, 423 pp, illus, Hardback
ISBN 1-56347-182-5
AIAA Members $69.95
List Price $84.95
Order #: V-168(945)

CA and VA residents add applicable sales tax. For shipping and handling add $4.75 for 1–4 books (call for rates for higher quantities). All individual orders, including U.S., Canadian, and foreign, must be prepaid by personal or company check, traveler's check, international money order, or credit card (VISA, MasterCard, American Express, or Diners Club). All checks must be made payable to AIAA in U.S. dollars, drawn on a U.S. bank. Orders from libraries, corporations, government agencies, and university and college bookstores must be accompanied by an authorized purchase order. All other bookstore orders must be prepaid. Please allow 4 weeks for delivery. Prices are subject to change without notice. Returns in sellable condition will be accepted within 30 days. Sorry, we can not accept returns of case studies, conference proceedings, sale items, or software (unless defective). Non-U.S. residents are responsible for payment of any taxes required by their government.
